During his tenure with us, Soham was involved in a variety of projects within our Game Development Research team. His responsibilities included contributing to the development and research of interactive games in the domain of amblyopia/lazy eye and documentation. Soham displayed a satisfactory level of competence in all tasks assigned to him.

Soham worked under the guidance of our experienced team members and showed a commendable level of dedication and enthusiasm in learning new technologies and applying them in practical scenarios. His contribution to the projects he was involved in was valuable and appreciated.

While Soham internship with VSquare Meditech was based on a remote working model, he demonstrated excellent communication skills and the ability to work well independently as well as part of a team. He adhered to project timelines and consistently met deadlines.
